SHALL (shal), *v. i.*, *verb auxiliary*; pret. *should.* [Sax. *sceal-an*, *scylan.* *Shall* is defective, having no infinitive, imperative, or participle.] 1. *Shall* is primarily in the present tense. We still use *shall* and *should* before another verb in the infinitive without the sign *to*; but the signification of *shall* is considerably deflected from its primitive sense. It is now treated as a mere auxiliary to other verbs, serving to form some of the tenses.—In the *present tense*, *shall*, before a verb in the infinitive, forms the future tense; but its force and effect are different with the different persons or personal pronouns. Thus, in the *first person*, *shall* simply foretells or declares what will take place; as, I or we *shall* ride to town on Monday. 2. In the *second* and *third persons*, *shall* implies a promise, command, or determination; as, you *shall* receive your wages.—3. *Shall I go? shall he go? interrogatively*, asks for permission or direction. But *shall you go?* asks for information of another's intention. 4. But, after another verb, *shall*, in the *third person*, simply foretells; as, he says that he *shall* leave town to-morrow. So, also, in the *second person*; as, you say that you *shall* ride to-morrow. 5. After *if*, and some verbs which express condition or supposition, *shall*, in all the persons, simply foretells.—6. *Should*, in the *first person*, implies a conditional event. 7. *Should*, though properly the past tense of *shall*, is often used to express a contingent future event; as, if it *should* rain to-morrow.

In the *University of Cambridge, England*, the title of students who are advanced beyond the first year of their residence. The entire course at the university consists of three years and one term, during which the students have the titles of First-Year Men, or Freshmen; Second-Year Men, or Junior Sophs or Sophisters; Third-Year Men, or Senior Sophs or Sophisters; and, in the last term, Questionists, with reference to the approaching examination. In the older American colleges, the junior and senior classes were originally called Junior Sophisters and Senior Sophisters. The term is also used at Oxford and Dublin.

SOPH'O-MORE, *n.* One belonging to the second of the four classes in an American college. [This word has generally been considered as an "American barbarism," but was probably introduced into our country, at a very early period, from the University of Cambridge, England. Among the cant terms at that university, as given in the Gradus ad Cantabrigiam, we find SOPH-MOR as "the next distinctive appellation to Freshman." It is added, that "a writer in the Gentlemen's Magazine thinks *mor* an abbreviation of the Greek *μωρια*, introduced at a time when the *Encomium Moriæ*, the Praise of Folly, by Erasmus, was so generally used." The ordinary derivation of the word, from *σοφος* and *μωρος*, would seem, therefore, to be incorrect. The younger Sophs at Cambridge appear formerly to have received the adjunct *mor* (*μωρος*) to their names, either as one which they courted for the reason mentioned above, or as one given them in sport, for the supposed exhibition of inflated feeling in entering on their new honors. The term, thus applied, seems to have passed at a very early period from Cambridge in England to Cambridge in America, as "the next distinctive appellation to Freshman," and thus to have been attached to the second of the four classes in our American colleges; while it has now almost ceased to be known even as a cant word at the parent institution in England, from whence it came. This derivation of the word is rendered more probable by the fact, that the early spelling was, to a great extent at least, Sophimore, as appears from the manuscripts of President Stiles, of Yale College, and the records of Harvard College down to the period of the American Revolution. This would be perfectly natural if Soph or Sophister was considered as the basis of the word, but can hardly be explained if the ordinary derivation had then been regarded as the true one.—*Ed.*]

T.

T is the twentieth letter of the English alphabet, and a close consonant. It represents a close joining of the end of the tongue to the root of the upper teeth, as may be perceived by the syllables *at*, *et*, *ot*, *ut*, in attempting to pronounce which, the voice is completely intercepted. It is therefore numbered among the mutes, or close articulations, and it differs from *d* chiefly in its closeness. The letters *ti*, before a vowel, and unaccented, usually pass into the sound of *sh*, as in *nation*, *motion*, *partial*. In this case, *t* loses entirely its proper sound. In a few words, the combination *ti* has the sound of the English *ch*, as in *Christian*, *question*.

T., as an *abbreviation*, stands for *theologia*; as, S. T. D., *sanctæ theologiæ doctor*, doctor of divinity.

As a *numeral*, T, among the *Latins*, stood for 160; and, with a dash over the top, $\overline{T}$, for 160,000.

U.

U is the twenty-first letter and the fifth vowel in the English alphabet. The first, or long and proper sound of *u*, in English, is now not perfectly simple, and it can not be strictly called a *vowel.* The sound seems to be nearly that of *eu*, shortened and blended. This sound, however, is not precisely that of *eu*, or *yu*, except in a few words, as in *unite, union, uniform*; the sound does not begin with the distinct sound of *e*, nor end in the distinct sound of *oo*, unless when prolonged. It can not be well expressed in letters. This sound is heard in the unaffected pronunciation of *annuity, numerate, brute, mute, dispute, duke.*—In some words, as in *bull, full, pull*, the sound of *u* is that of the Italian *u*, the French *ou*, but shortened. This is a *vowel.*—*U* has another short sound, as in *tun, run, sun turn, rub.* This, also, is a *vowel.*
